Norwegian Air commits to reduce CO2 emissions by 45 percent by 2030

OSLO (SEPTEMBER 21, 2020) – Norwegian Air has launched a new environmental sustainability strategy that will begin immediately and deliver several industry leading targets. Cutting CO2 emissions by 45 percent, remove all non-recyclable plastics and recycle all single-use plastics are key commitments in the new strategy. The goal is in line with the 1.5°C (2.7°F) target set forth in the Paris Agreement.

"At Norwegian we take our responsibility towards the environment seriously, and that is why we must look to the future and implement a strategy that produces immediate and tangible benefits for the environment today.

Norwegian will continue to instigate a positive change across the industry in this field that will benefit not only the environment but also our customers and our business. The low-cost business model is the sustainability model as it enables efficient energy and resource management,” said Jacob Schram, CEO of Norwegian.

Will require 500 million litres sustainable aviation fuels

To limit global warming to 1.5°C, carbon emissions must be reduced by 45 percent by 2030 compared to 2010 levels, according to the International Panel on Climate Change ([IPCC, 2018](#)). Norwegian commits to improve the carbon efficiency of our operations and will reduce our carbon emissions by 45 percent per passenger kilometer (RPK) by 2030 - compared to 2010 levels. This will be achieved through both fleet renewal and sustainable aviation fuels.

The airline commits to utilizing between 16 and 28 percent sustainable aviation fuels by the end of the decade, depending on the level of fleet renewal. The target amounts to up to 500 million litres sustainable aviation fuels by 2030.

To achieve this important goal, it is also crucial to get in place a regulatory framework that actively rewards carbon efficiency and increases both the production and use of sustainable aviation fuel.

“We encourage producers to ramp up production of sustainable aviation fuels. Norwegian will be actively engaging with producers to kick start this vital contribution to the industry and take advantage of the emission savings that these fuels offer,” Jacob Schram added.

Will remove all non-recyclable plastics

Initial elements of the sustainability strategy will also include a 100 percent reduction of non-recyclable plastics and 100 percent recycling of single-use plastics by 2023.

“More sustainable and smarter options are becoming a greater part of the considerations that customers make when choosing which airline to fly with. We will champion this attitude and become the customers sustainable choice

by reducing and recycling plastic waste, promoting sustainable aviation fuel and continuing to fly one of the world's youngest fleets to achieve a 45 percent reduction in CO2 emissions by 2030," said Anders Fagernæs, Norwegian's Head of Environmental Sustainability.

A solid foundation

Norwegian is already one of the world's leading fuel-efficient carriers due to its modern fuel-efficient aircraft. Norwegian was the first airline to sign the United Nations Framework Convention on Climate Change (UNFCCC) pledge, committing to become carbon neutral by 2050.

The airline was also named [the world's most fuel-efficient airline on transatlantic routes](#) in 2015 and 2018 by the International Council on Clean Transportation (ICCT), and since 2010 the airline has reduced its emissions by 28 percent.

About Norwegian Air

Norwegian Air is the world's fifth largest low-cost airline and carried over 36 million passengers in 2019. Norwegian has a fleet of around 160 aircraft, with an average age of 4.6 years, making it one of the world's youngest and most fuel-efficient fleets.

Norwegian has been named the [Most Fuel-Efficient Airline on Transatlantic Routes](#) by the International Council on Clean Transportation (ICCT) twice. In 2019, the airline [saved 1.7 million metric tons of CO2 emissions](#) compared to the industry average. Norwegian has been voted 'Europe's Best Low-Cost Airline' by passengers for six consecutive years at the SkyTrax World Airline Awards 2013-2019, along with being named the ['World's Best Low-Cost Long-Haul Airline'](#) for the past five consecutive years. Norwegian employs more than 11,000 people worldwide.
